STUDENT SATISFACTION SURVEY 2024-2025

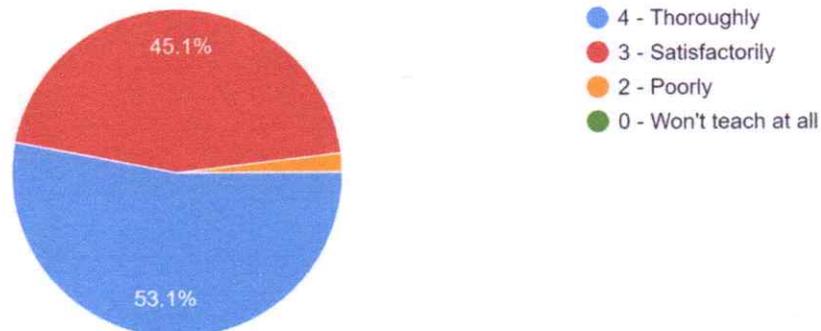

1. How much of the syllabus is covered in the class

652 responses

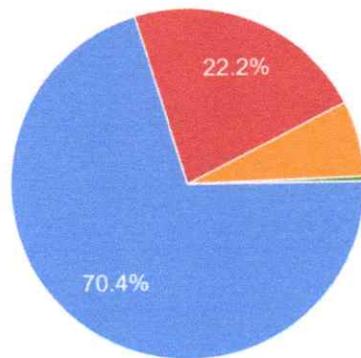

2. How well the teacher prepare for the classes

652 responses

3. How well the teachers able to communicate

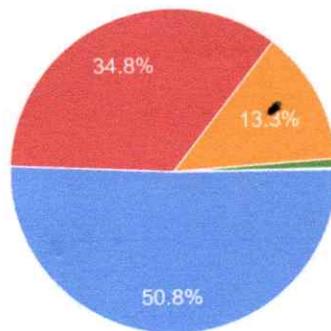

652 responses

- 4 - Always Effective
- 3 - Sometime Effective
- 2 - Just Satisfactory
- 0 - Very Poor Communication

4. The teachers approach to teaching can best be described as

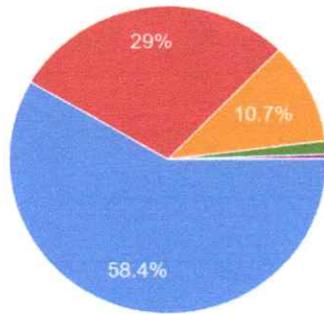

652 responses

- 4 - Excellent
- 3 - Very Good
- 2 - Good
- 1 - Fair
- 0 - Poor

5. Fairness of Internal Evaluation Process by the teachers

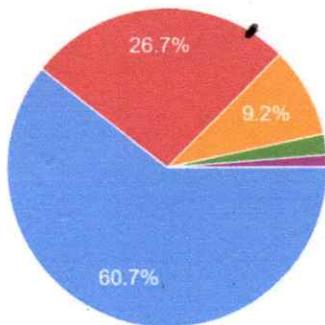

652 responses

- 4 - Always Fair
- 3 - Usually Fair
- 2 - Sometimes Unfair
- 1 - Usually Unfair
- 0 - Unfair

6. Was your performance in assignments discussed with you?

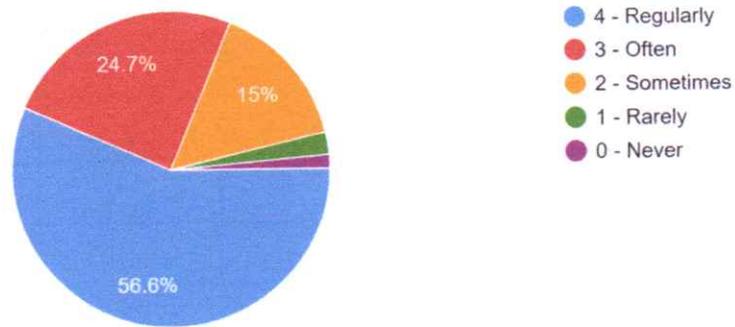

652 responses

- 4 - Every time
- 3 - Usually
- 2 - Occasionally/ Sometimes
- 1 - Rarely
- 0 - Never
- Option 6

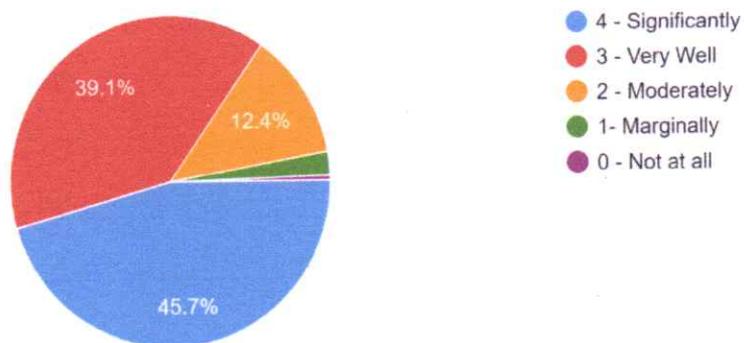

7. The institute takes active interest in promoting internship, students exchange, field visit opportunities for students

652 responses

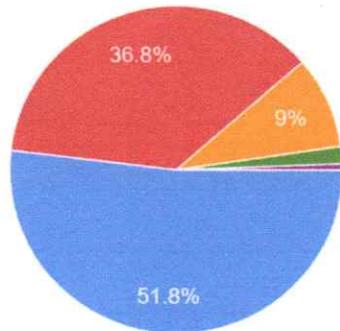

8. The teaching and Mentoring process of your institution facilities you in cognitive, social and emotional growth

652 responses

9. The institution provides multiple opportunities to learn and grow

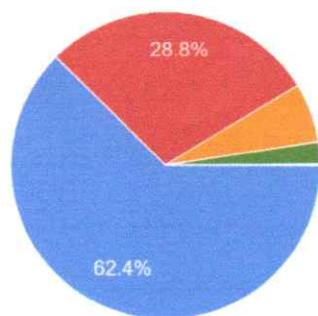

652 responses

- 4 - Strongly Agree
- 3 - Agree
- 2 - Neutral
- 1 - Disagree
- 0 - Strongly Disagree

10. Teachers inform you about your expected competencies course outcomes and program outcomes

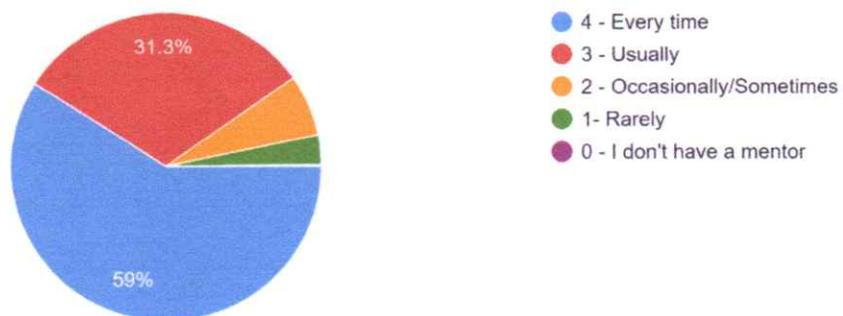

652 responses

- 4 - Every time
- 3 - Usually
- 2 - Occasionally/Sometimes
- 1 - Rarely
- 0 - Never

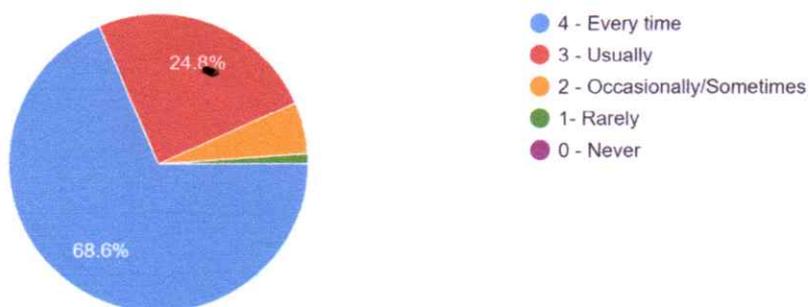

11. Your mentor does a necessary follow up with an assigned task to you

652 responses

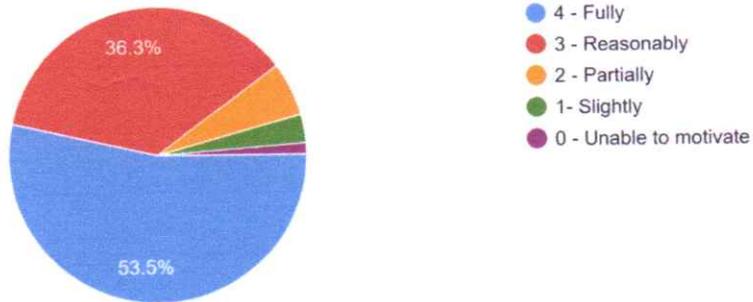

12. The teachers illustrate the concepts through examples and applications

652 responses

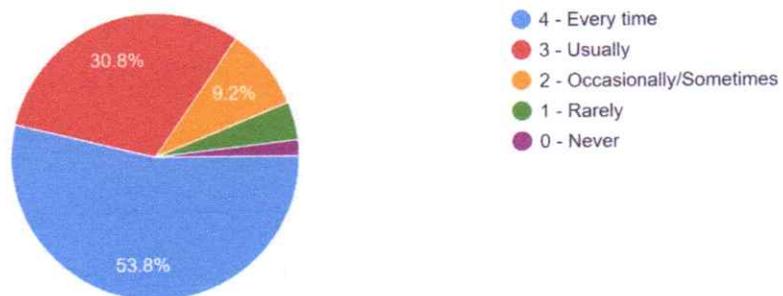

13. The teachers identify your strengths and encourage you in providing right level of challenges

652 responses

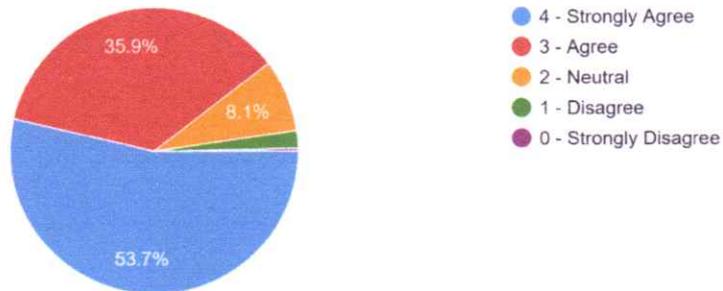

14. The teachers are able to identify your weakness and help to overcome them

652 responses

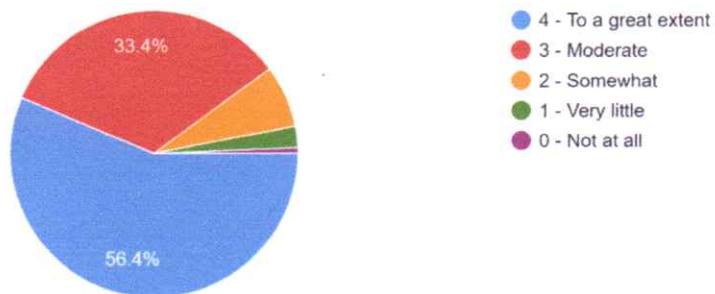

15. The institution makes effort to engage students in monitoring review and continuous quality improvement of teaching learning process

652 responses

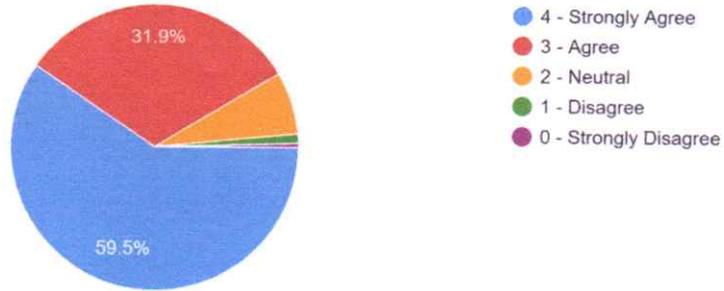

16. The institution/ teachers use student - centric methods, such as experimental learning and problem solving methodologies for enhancing learning experience

652 responses

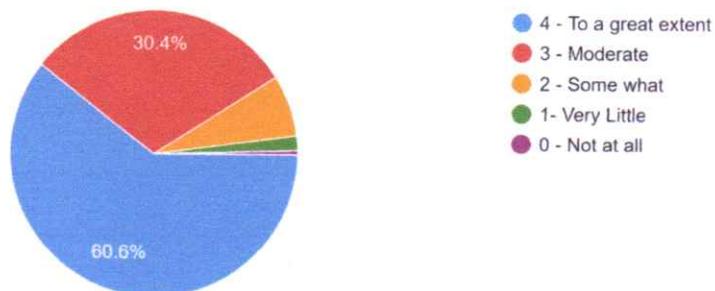

17. Teachers encourage you to participate in extracurricular activities

652 responses

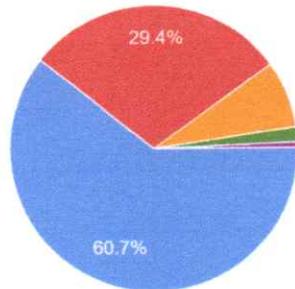

18. Efforts are made by the institution/teachers to inculcate Soft Skills, Life Skills, Employability Skills to make you prepared for workplace

652 responses

19. What percentage of teachers use ICT tools such as LCD projector, Multimedia etc. While teaching

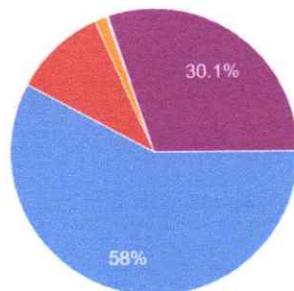

652 responses

- 4 - Above 90%
- 3 - 70 - 89%
- 2 - 50 - 69%
- 1 - 30- 49%
- 0 - Below 29%

20. The overall quality of Teaching - Learning Process in your institution is very good

652 responses

- 4 - Strongly Agree
- 3 - Agree
- 2 - Neutral
- 1 - Disagree
- 0 - Strongly Disagree

21. Give three observations/ suggestions to improve the overall teaching -learnings experience in your institution

Good

Good

All good

Excellent

No comments

Very good

Good explanation

Very good

Yes

No more suggestions

Ok

All are good

It's good, and there is a lot of improvement

Teachers should focus on teaching rather than gossiping about students' personal lives.

Counselling weaker students, at least try to avoid preconceived notions, and maintain a neutral, fair environment

Better expensive

Very excellent

Make a productive study

The room structure should be changed

Everything is good

It would be great if there were updated versions of books on Psychology and others. It would be helpful if notepads or books were allowed in the library for taking notes. It would be helpful if the basement classrooms were cleaned regularly and properly.

1. Every faculty teaches very well with examples, but sometimes they get stuck and diverted by those examples. 2. The faculty sometimes need to keep up with the syllabus, like they have to complete the lesson on time. 3. Overall is very good

Everything is good

Need more practical-based learning than theoretical

Nothing to be suggested, and everything is great

No suggestions, everything is fine

1 - speaking slowly to let the student catch up 2 - speaking only in English 3 - understanding student feelings

I suggest that in a few classes, where anything is told or explained by teachers in Telugu for better understanding of the students, be repeated once again in English for the students who don't know Telugu, so that they know the students know that they haven't missed anything important due to a language barrier

Complete the syllabus as much as possible, and soon give time to do revision

Normal only regarding subjects, we can improve our learning skills in different ways

Very excellent faculty

Should improve many more
Friendly nature to be adopted
Everything is good.

Encouraging students and teachers to speak in English most of the time is essential. Biased opinions, favoritism, and unfair treatment in providing opportunities for students, as well as comparing capabilities, should not be part of the college environment. Teachers ought to treat everyone fairly and professionally.

1. Provide regular training to enhance teaching skills. 2. Encourage student feedback to identify areas for improvement. 3. Offer mentorship programs to support faculty development.

Complete the syllabus within the time
Everything is perfect about my institution

No Suggestions

Understand students without any comparison

It's a very good experience

Obey with students

Give examples based on daily life situations

Digitalization

Complete syllabus

Well

It's a good experience

They need to ask students for personal feedback, not on mobile

I am fully satisfied

Provide all the equipment for better development. To get real experience in project work want to visit some places. Make sure to complete the syllabus a week before exams start.

Good, Excellent, Not bad

The one who teaches should be understandable.

The syllabus is being completed at a time. Assignments are more, and giving all at once should be improved

Has To Allow Students to Participate In Other Domain-Related Activities Conducted by Various Organisations

Good excellent job

Explaining more deeply and solving any kind of doubts

Good teaching and a great place to learn new things

Well done

1. Clear 2. Easy 3. Fun

Teachers should come prepared to Class, as some teachers' teaching makes us feel sleepy and boring. I suggest the teacher should not only focus on covering the syllabus in 40 minutes of class, but also make children feel relaxed by maintaining a funny and jovial atmosphere, and also teach with enthusiasm

Everything perfect

1 - Trying to cover the portion from the beginning rather than pressurising entirely at the end.

2 - If there are certain free periods not take them even if the syllabus is not completed

Need for more improvement in teachers

Everything good

Teaching should be interactive, and experimentation is necessary

1) More subject-oriented guest lectures. 2) Use of animated videos or 3D videos.

1. Be open to students' doubts and explain patiently. 2. Make lessons more fun and easier to understand. 3. Give real-life examples while teaching.

1. The course curriculum can be improved by giving more and more practical projects, like in computer science 2. Application-based projects need to be started right from 1st year 3.

Students need to be given freedom to explore many other opportunities like workshops, hackathons, and project competitions, especially in computer science.

1. By taking feedback from every individual student
2. Using technology widely
3. Collaboration with students

Nothing, I love the way they are....

It would be better if they taught about a relevant topic

Should take more interest in the field trips
Improve their speaking skills while explaining

More communication with students

More student interaction must and should.

Provide a good source and learning

They're exceptional teachers both in education and as in personality. Every one of them are genuine and always caring and supportive to students. I am always grateful to have them.

While explanation and other experiments are ok, but behaviour is different. According to the students, we are also paying fees, pls, principal sister, to take action to maintain equality... what sometimes teachers are losing their touch. One student. We have to learn from them. If they are CRITICISING other student because of marks, richness, taking revenge, etc, it is not correct, I feel..

More practical activities, competitive preparation,

Not needed. Already excellent

Need to improve teaching skills

I am fully satisfied

Very good

More efforts, labs, field trips, complete syllabus

Good

Faculty
Cleanliness
Bus facility

Need to complete the lesson before the one week of exams, need to explain every part with an example

Nothing

Be calm
Be potential
Obey students

1. Better Classroom Environment
2. Peer to peer
3. Effective communication between teachers and students

The syllabus must be completed before the exams.

Students should be taken to the fields outside for real experience

Nothing

Teachers are well and good, there is no observation to me

Equality among all the students in the class

Calm

Honest

Confident

Explanation should be in proper English.

Nothing required.....Doing well

It's a good experience

Good lectures and college

Obey with students

Satisfactory, but needs some extracurricular activities like events

There is no observation

1. Using more ICT tools
2. Much more quality interaction with students
3. Giving regular tasks to improve the student's skills

Good

By using technology and observing their activity, and by encouraging them to improve their ability

Their teaching is very good and can be understood easily

Teaching should be interactive, and experimentation is necessary

1) Accepting more interactive

It's an outstanding performance always given by our teachers.

No need to improve

Nothing was there to tell any suggestions

Please complete the syllabus within the time, and give the assignments and records beforehand

Good

Excellent

Not bad

1. Use better graphics and visual media to engage students well.
2. Try to reach every student and ask for their doubts.
3. Make teaching a two-way interaction.

Complete the syllabus within the time

Complete the syllabus as much as possible, and soon give time to do revision

Everything is good and they know very well.

More examples

More explanation in the practicals

Conducting tests

It would be better if they plan concept-related activities

Interaction should be clear

More clear examples should be given

Overall, teaching was good.

As a student, I have to improve my skills and knowledge.

Usage of layman's language for better understanding.
With known examples.

Maybe a cleaner environment in classrooms can help a bit.

Nothing

Every aspect and teaching is good, so I don't have any suggestions to give
I hope I can gain more knowledge from the subject I learn

Yes, the college was overall good, but if they could provide a transport facility too, it would make most of us students coming from far can come and go without any fear

The syllabus is being completed at a time

Assignments are more, and giving all at once should be improved

1. Practical records of some subjects are put till the last date and causing a lot of stress to students, due to which students are unable to focus on academics. The academic administration may kindly ensure that policies so that it can be prevented in the future
2. Mentors should at least provide guidance on various competitive examinations apart from the academic curriculum
3. Innovative and critical thinking should be encouraged among students

Understand students without any comparison

Everything perfect

Don't show partiality between the average and the topper student

There is no gap for semester exams; there has to be at least one day's gap for every exam

On the premises of the campus, everyone should communicate in English

To assign the records and assignments to be written earlier rather than close to the end of the semester.

- 1 - Speaking slowly to let the student catch up
- 2 - speaking only in English
- 3 - Understanding student feelings

semester exam can be conducted while giving sufficient time

Teachers should explain more effectively

Good explanation

Yeah, it's exactly true and the great leaning towards skills. So, thank you so much for your valuable time sharing with me

All are perfect

I can concentrate on what the teacher is teaching

Can be more open with students, so it also makes students more comfortable coming up with their doubts

The faculty of our department does an extremely amazing job, so no suggestions required

No suggestions

Very excellent faculty

1. Practical exposure
2. Mentorship programs
3. Workshops and guest lecturers

Nothing is there to give suggestions to the institution...the faculty knows all about students' careers and their studies 😊

Avoid using the local language during classes.

Digital facilities should be increased for all students

Teachers are very biased towards certain students, neglecting or targeting others.

Doubts are rarely clarified when asked, teachers say that they will clarify in the next class, but never do.

When an impartial environment is implemented, students learn better, it encourages them to do better.

Friendly nature to be adopted

1. Can be more use of multimedia.
2. Can be more field visits.
3. Overall, it was all relevant and satisfactory.

It's good, and there is a lot of improvement

1. I gained a lot of knowledge about the subject, which was new to me.
2. Teachers are friendly, and they clarify the doubts.
3. Learnt how to face problems

Mainly, partiality should not be there for teachers towards their close students

Teachers should treat every student equally

There are no suggestions

The way they taught throughout the semester is enough

Teachers should only explain the topics in English.

The teacher should only explain the topics in English, including small announcements.

Speaking in English most of the time should be encouraged both for teachers and students.

Biased opinions, favouritism, unfair treatment when it comes to providing opportunities to the students, comparing capabilities - such acts should not be a part of the college's environment. Teacher's ought to treat everyone fairly and professionally.

Firstly the most of the teachers don't speak English properly

Favoritism of students by lecturers

The lack of communication problem because they don't communicate

No suggestions because the teaching staff is good and well-trained

1. More placement in future career
2. Good learning and research
3. Foster learning and development

They should be thorough with the topic.

They should keep accessory tests ones in a week about the topics discussed in that week.

They should be friendly with the students.

Teachers should concentrate on the weak students

Teachers should try to improve students' knowledge rather than just teaching what is in the book/syllabus

Very good

Language problem. (the students who don't know Telugu)

All good.

- 1) Our teachers teach us very well
- 2) They use multimedia for teaching
- 3) They use a lot of examples for better understanding

1) More subject-oriented guest lectures.

2) Use of animated videos or 3D videos.

1. Please get rid of last-minute plans or instructions. 2. Engage every student in communication.

St. Joseph is the best when it comes to encouraging students to showcase their talents.
The talent is always nurtured.

Lecturers always brush up on their talents and support us.

St. Joseph not only encourages but also improves growth in co-curricular activities.

1. Encouraging Broader Participation: It would be helpful if teachers involved all students more actively in class discussions, rather than focusing on a few.

2. Improve Fairness in Internal Evaluation: Ensuring a more transparent and balanced evaluation process would help students feel more confident and motivated.

3. Continued Field Exposure: The industrial trip to Araku was a valuable learning experience. More such field visits in future semesters would help connect theory with real-world practice.

1) Continuous activities sometimes disturb classes

2) All the faculty members should use projectors

Three things that could enhance our learning experience - more interactive sessions, one on one discussions, and fun subject related activities.

Be more effective, good, and liberal, which helps students to interact with the faculty

Focus on every student
strong ability to control the whole class
Usage of visual examples

Lesson Planning and Execution
Classroom Management and Engagement
Student Interactions and Learning

Generally, focusing on every student is hard. Even I know that. But focusing more on the students gives them the motivation to study more efficiently. And sometimes, slowing down the pace of teaching for the backward students is more efficient than moving forward with only a few students. That's all from me

1. Provide regular training to enhance teaching skills.
2. Encourage student feedback to identify areas for improvement.
3. Offer mentorship programs to support faculty development.

Everything is perfect about my institution

1. Be open to students' doubts and explain patiently.
2. Make lessons more fun and easier to understand.
3. Give real-life examples while teaching.

attendance system is not at all satisfactory. If there is something important, we don't get notified prior.

teaching is fine from every department.

French is a little difficult to learn cuz of the language barrier.

A well-disciplined college, but not satisfied with some teachers' explanation
